

An International Youth Hackathon

FAR AWAY

For *Ambitious* Builders.

FAR AWAY brings together students and young builders aged 15–25 to build real-world products, collaborate globally, and gain exposure beyond traditional classrooms and competitions.

遠くへ、
行こう。

BUILD
BEYOND
BORDERS.

01

ONLINE ROUND

Open global qualifiers.
Build, collaborate, and
bring ideas to life.

02

DELHI ROUND

Top teams compete
in-person with mentorship,
workshops, and resources.

03

JAPAN FINALE

Top 5 teams win a fully
sponsored trip to Japan.
Flights. Hotel. Meals.
Experiences. Covered.

WE DON'T JUST RUN A HACKATHON.
WE BUILD OPPORTUNITIES.

Workshops, mentorship, modern tools,
and global exposure — helping the next
generation of builders turn ideas into impact.

FOR PARTNERSHIPS

Join us in empowering the next
generation of builders.
Let's build the future. Together.

THE NUMBERS

Traction & Scale.

Launched organically on April 25.
Reached 10+ countries in weeks
without paid marketing.

7,100+

Registrations

10+

Countries

3,600+

Teams

₹0

Ad Spend

400+

Slack Members

100K+

Daily Visits

Existing Partners

Verified Execution

SME Business of the Year 2025.
Shark Tank India Season 5 Phase 1.
Scaled global Cloudflare infrastructure.
Verifiable credibility.

Why We Are Different

Rethinking
Traditional
Limitations

Most student events
reward experience.
FAR AWAY rewards
ambition.

Modern
AI Workflows

FAR AWAY embraces
modern AI-assisted
building workflows.
Use LLMs, tools, and
agents. Build like
it's 2026.

Global
Competition

10+ countries
registered in the first
3 weeks. You are
competing against the
best young builders
worldwide.

Industry-
Relevant Skills

We run PCB Design &
AI Prototyping
Workshops pre-
hackathon.
Participants arrive
knowing what to do.

The prize
is a trip

Not a voucher. Not a
trophy. The top 5
teams fly to Japan.
Flights, hotel, meals —
fully sponsored.

Media & Content Strategy

We don't just host an event; we document a movement.
Partnering with FAR AWAY guarantees high-visibility placement
across platforms reaching an aspirational youth audience.

Vlog Coverage

Japan finale
mini-documentary

Creator Collabs

60K+ views on
single organic reel

Livestreams

updates

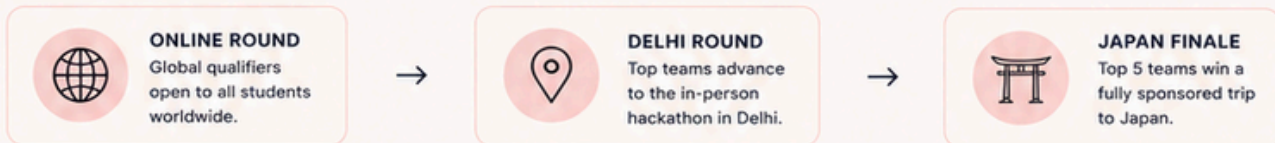

ABOUT FAR AWAY.

Dear Potential Sponsor,

FAR AWAY is an international youth hackathon organized by Zuup, a youth led nonprofit initiative focused on technology, skills, and real world building.

Our mission is to create opportunities for ambitious students and young builders aged 15–25 to turn ideas into real products, collaborate globally, and gain exposure beyond traditional classrooms and competitions.

The event takes place across three stages:

The top 5 teams win a fully sponsored trip to Japan.

FAR AWAY is built around modern technology culture where participants are encouraged to explore AI, hardware, software, rapid prototyping, and unconventional ideas without restrictive barriers.

In addition to the hackathon itself, we also conduct workshops and webinars around PCB design, AI tools, product development, and startup focused execution to help students prepare before the competition begins.

WHY SPONSOR?

Your support would directly help thousands of students access opportunities, mentorship, infrastructure, workshops, and experiences that many otherwise would never have exposure to.

Sponsorship contributions help support:

- event operations
- participant experiences
- venue costs
- workshops and learning sessions
- travel support
- infrastructure and tooling
- creator and media coverage
- hackathon logistics

As a sponsor, your organization would gain direct access to one of the fastest growing youth tech communities currently emerging online.

OUR IMPACT SO FAR

FAR AWAY has already crossed:

- 7,000+ registrations
- 10+ countries
- 3,600+ teams
- 100% organic growth
- ₹0 spent on paid ads

Our audience consists of:

- developers
- designers
- startup founders
- AI builders
- engineers
- creators
- internet native students

This creates a unique opportunity for organizations to connect with future builders, future customers, and future technical talent at a very early stage.

WHY WE ARE DIFFERENT

A large number of talented students across India and other countries never get access to global exposure, strong technical communities, or modern innovation ecosystems.

Most hackathons remain limited by geography, experience barriers, institutional restrictions, or accessibility issues.

FAR AWAY was created to challenge that.

We believe ambitious students should not be limited by where they live, their background, or whether they already have industry level experience.

A student building projects from a bedroom with only internet access should still have the opportunity to compete globally, build meaningful technology, and potentially present their work internationally.

That philosophy is what shaped FAR AWAY.

OUR APPROACH

AI ASSISTED WORKFLOWS

We embrace AI tools, LLMs, agents and modern workflows to build like the future.

OPEN TO ALL LEVELS

From first time builders to experienced creators, everyone is welcome.

RAPID EXPERIMENTATION

We encourage bold ideas, fast iterations and real world problem solving.

GLOBAL COLLABORATION

Students from different countries, cultures and backgrounds build together.

EXECUTION OVER THEORY

We focus on building real products, learning by doing and solving meaningful problems.

Unlike traditional events focused only on coding competitions, FAR AWAY focuses on execution, creativity, learning, and product thinking.

BUILT ORGANICALLY

FAR AWAY launched with no paid marketing campaign.

Within weeks, the event spread across:

- Instagram
- LinkedIn
- student communities
- creator pages
- Discord and Slack groups
- word of mouth referrals

Registrations rapidly grew internationally while the entire event continued to be managed by a small youth led team.

The overwhelming response validated something important: **young builders are actively looking for larger, more ambitious spaces to build and collaborate.**

Your support and partnership would help us continue building that space.

Thank you for your time and consideration.

Sincerely,
Team FAR AWAY
